Use Cases

Project name: MediGram

Team 22

Use case ID naming convention:

UC -- Use Case, S -- Sign up, P -- Patient, C -- Care provider, PC -- P and C, SA --

System Admin

UC-01

Use case name: Sign in

Actors:

- patient
- care provider

Goal: log the user into APP and take them to their corresponding page

Triggers:

- user starts the APP

Preconditions:

- all user has the APP installed
- care provider has internet access (not necessary for patient).

Postconditions:

- take patient to UC-P-01
- take care provider to UC-C-01
- take unregistered user to UC-S-01

Basic flow:

1. starts APP
2. enter user ID

    2.1. if user has no id, they can choose to sign up

    2.2 click "create an account" button

3. click "Sign in" button

Exception:

Exception 3: user ID not found

3.1: take user to sign up page (2.1)

UC-S-01 (US 03.01.01, US 03.01.02, US 03.01.03)

Use case name: sign up new account

Actors:

- new user

Goal: user creates a new account

Triggers: "create an account" button in UC-01

Preconditions:

- new user does not already have a user ID

Postconditions:

- new user ID created and saved by the APP

- take user to UC-01

Basic flow:

1. enter new user ID

2. enter email

3. enter phone number

4. choose a role from "patient" and "care provider"

5. click "Create an account" button

Exception:

Exception 1: user ID not valid (too short or already taken)

1.1: shows warning message to user

1.2: go back to Basic flow 1

UC-P-01 (US 03.02.01)

Use case name: view profile

Actors:

- patient

Goal: review patient profile, patient can select a specific body area to see its problems

Triggers:

- "Sign in" button in UC-01

Preconditions:

- patient is signed in

Postconditions:

- if patient sign out, take patient to UC-01
- if patient search a problem, take patient to UC-P-02
- if patient edit profile, a keyboard pops up and user can type in new information

Basic flow:

1. patient reads the page
   a. review profile
   b. reads body map
2. patient clicks one of the buttons/text input box
   a. click "sign out" button to log out and go back to sign in page
   b. click "edit" button to edit user profile
   c. enter a body area keyword and click "search" button to search specific problems

Exception:

Exception 2c: user input invalid (no such keyword)

2.1: enter again

UC-P-02 (US 01.02.01, US 02.09.01)

Use case name: view problem list

Actors:

- patient

Goal: show list of problems with titles, dates, and number of records

Triggers:

- "Search" button in UC-P-01

Preconditions:

- patient entered valid body area keyword

Postconditions:

- new problem is added: UC-P-03
- existing problem is edited: UC-P-04
- search an existing problem: UC-P-05
- show records of a problem UC-P-06
- a problem is deleted: UC-P-07
- a daily reminder is added

Basic flow:

1. read the history of problems
2. make a decision
   a. add a new problem by clicking plus button
   b. edit a problem by holding press on the problem icon, and choose "edit problem" option in the pop up menu
   c. search problem(s) by typing keywords in the search box (nothing shows up if no matching results)
   d. view records of a problem by clicking on the problem icon

Exception:

Exception 1: problem title too long (limit 30 chars)

      1.1: go back to flow 1, choose another title

Exception 3: description too long (limit 300 chars)

      3.1: go back to flow 3, write description again

Exception 6: less than 2 pictures or picture size too big

      6.1: ask user to re-add

UC-P-04 (US 01.01.02, US 01.01.03, US 01.03.01, US 09.03.01, US 11.03.01)

Use case name: edit problem

Actors:

- patient

Goal: make change on an existing problem

Triggers:

- "edit" button for a problem

Preconditions:

- there is at least one problem

Postconditions:

- edited problem updated to the list of problems

Basic flow:

1. edit title
2. edit date & time
3. edit description
4. edit pictures
5. confirm changes
6. problem updated

Exception:

Exception 1: problem title too long

    1.1: go back to flow 1, choose another title

Exception 3: description too long

    3.1: go back to flow 3, write description again

Exception 4: less than 2 pictures or picture size too big

    4.1: ask user to re-add

UC-P-05 (US 04.01.01, US 04.02.01, US 04.03.01)

Use case name: search problem

Actors:

- patient

Goal: search a problem from list of problems

Triggers:

- press enter key after typing the problem's keyword(s) in the text input box at the top

Preconditions:

-

Postconditions:

- problems matching with keywords shown in the list

Basic flow:

1. user taps on search box
2. enter keywords (can include geo-location/body-location keywords)
3. press "enter" key on virtual keyboard
4. search results show up (nothing shows up if no matching problems)

Exception:

UC-P-06 (US 02.01.01, US 10.03.01, US 11.01.01)

Use case name: view record list

Actors:

- patient

Goal: view list of records of a problem

Triggers:

- click on a problem icon in UC-P-02

Preconditions:

- there is at least one problem

Postconditions:

- slideshow mode
- one specific record is shown
- a new record added
- geo-locations for all records shown
- details of one specific record shown

Basic flow:

1. user reads the list of records
2. user can make a decision
   a. user can use slideshow mode by clicking "slideshow" button

      b. user can go to one record by clicking on record icon and can see its geo-location on a map

      c. user can add a record by clicking add record button (UC-P-08)

      d. user can see geo-locations for all records by clicking map button

      e. user can see details of one record by clicking on the record icon (UC-P-11)

Exception:

UC-P-07 (US 01.04.01)

Use case name: delete problem

Actors:

- patient

Goal: delete a problem from the list of problems

Triggers:

- "delete problem" option in the pop up menu after holding press on a problem in UC-P-02

Preconditions:

- at least one problem is in the list

Postconditions:

- the problem selected is deleted from the list

Basic flow:

1. hold press a problem on the list
2. click "delete problem" option in the pop up menu

Exception:

UC-P-08 (US 01.01.02, US 01.01.03, US 01.05.01, US 02.02-06.01, US 02.08.01, US 09.01.02, US 09.03.01, US 10.01.01, US 11.02.01)

Use case name: add record

Actors:

- patient

Goal: add a detailed record to a problem

Triggers:

- add record button in UC-P-06

Preconditions:

- current record is in the scope of a problem

Postconditions:

- a new record with title, body location, picture, geo-location, date & time, and description is added to record list

Basic flow:

1. click add record button
2. enter title
3. choose to add picture(s) that indicate a specific part on body location photo
4. take a photo
5. Indicate body location number.
6. add geo-location
7. add date & time
8. write a description
9. confirm changes
10. new record added

Exception:

Exception 2: title too long

       2.1: re-enter tile

Exception 3: user input body location not found

       3.1: re-enter a body location

Exception 5: total number of photo more than 10 or photo size exceeds 65536 kb

       5.1: refuse to save photo

Exception 7: description too long

       7.1: do 7 again

UC-P-09 (US 10.01.01, US 01.01.02, US 01.01.03, US 09.01.02, US 09.03.01)

Use case name: edit record

Actors:

- patient

Goal: make change(s) to an existing record

Triggers:

- "edit" button on the record icon in UC-P-06

Preconditions:

- there is at least one record in record list

Postconditions:

- edited record with new information is updated

Basic flow:

1. click on edit record button
2. edit title (user may leave it unchanged)
3. edit picture/photo that indicate a specific part on body location photo (user may leave it unchanged)
4. edit geo-location (user may leave it unchanged)
5. edit date & time (user may leave it unchanged)
6. edit comment (user may leave it unchanged)
7. confirm changes
8. record updated

Exception:

   Exception 2: title too long

               2.1: do 2 in Basic flow again

   Exception 3: total number of photo more than 10 or photo size exceeds 65536 kb

               3.1: refuse to save photo

   Exception 6: comment too long

               6.1: do flow 6 again

UC-P-10 (US 04.01.01, US 04.02.01, US 04.03.01)

Use case name: search record

Actors:

- patient

Goal: search a record from list of record

Triggers:

- enter the record's keyword in the text input box at the top

Preconditions:

-

Postconditions:

- records matching with keywords shown in the list

Basic flow:

1. user press on search box
2. enter keywords
3. press "enter" key on virtual keyboard
4. searching results show up (nothing shows up if no matching records)

Exception:

UC-P-11 (US 02.04.01, US 09.02.01, US 09.03.01, US 10.01.01, US 10.02.01, US 11.04.01)

Use case name: view one record

Actors:

- patient

Goal: see details of one record

Triggers:

- clicking on a record in UC-P-06

Preconditions:

- there is at least one record in the list of records

Postconditions:

- add photo and select corresponding body location

- gallery of patient's body location pictures

- add comment dialog

- add geo-location

Basic flow:

1. make a decision

    a. add comment by clicking add comment button

    b. add a picture

        i. take a photo

        ii. select body location
